NEW PROGRAM UPDATE - EMPMNT

A change has been added to the Release 11.5 version of the 'Employee Maintenance' screen (program **EMPMNT**).

This change will not allow an employee to display the social security number or the driver's license number when listing employees within employee maintenance.

The "Emp Change" field and the "Emp Inquire" fields within Security Maintenance (program **SECMNT**) have to be set to an N for this change to take effect on the Employee Maintenance (listing of employees) Screen.
