*****SALEITEM*****

SALEITEM – used to prevent selling over an advertised price.

This program can be used, along with the proper security to set a maximum price function by specific model number.

On any menu, press the F10 key and type in SALEITEM.

```

Sale Item Maintenance                                     12/03/07

SALEITEM – Adding a sale item to prevent selling over an advertised price

Next, choose F6-ADD to add the model number that you want to limit the sale price ceiling for.

```

                                     Sale Item Add                                     12/03/07
Store Nbr:      1702                Begin Sale Date:  11/25/07
Sale Type:      A                   End Sale Date:   12/31/07

Model Nbr: FCASHT280-13            Vendor Nbr:

Item description #1: TEST1
Item description #2: TEST2

Sale percent discount:      0.000
Sale fixed price:          200.00
Dollar amount off:         0.00
Commission type:
Sale commission pct:       0.00
Sale fixed commission:     0.00

Any More Changes:  N

```

Above is an example of adding a sale item. As you see, you can set the sale dates on when this model number is being advertised.

There is a security setting that also needs to be set to N in order to disallow the employee to go over the price as set in SALEITEM. The field is called "Owner Override OK". If set to Y, then the employee can sell the item for more than the Sale Fixed Price in SALEITEM.
