*****NEW PROGRAM UPDATE - SALETICK*****

A change has been added to the Release 11.5 version of the 'Sales Ticket' screen (program SALETICK).

```

Sale Ticket Change                                02/17/06

```

This change allows you to do a sale refund without having "Sale change" turned on in Security Maintenance (SECMNT program). Prior to this update, you would have to set "Sale Change" to Y and allow changes to a sale in order to do a sale refund. With this update, you can have the "Sale change" field set to N and still be able to do a refund within the SALETICK program with the "Sale Refund" set to Y.

```
