*****NEW 11.5 FIX - LRCUST*** Build Rental Customer Label File**

In LRCUST, there is a criteria question "SALESMAN NBR TO PRINT:". For some reason the system is filling in that field with a bogus number and if you do not clear it out, you will get an error message.

There is a fix that can be applied to fix this problem. Please contact Fanci Cross if you need this fix applied. All clients upgraded prior to January 28, 2005 will have this fix applied by February 4, 2005.

Any clients upgraded to Release 11.5 will have this fix incorporated into their upgrade.
